EMMANUEL SIMIYU
Nairobi, Kenya | +254796154390 | emmanuelsimiyu7007@gmail.com | www.linkedin.com/in/emmanuel-simiyu-24a04b444

PROFESSIONAL SUMMARY

Analytical AI Quality Specialist with a background in Applied Linguistics and Computational Analysis. Expert in RLHF (Reinforcement Learning from Human Feedback), prompt engineering, and multi-turn conversational evaluation. Proven track record in assessing LLM outputs for grounding, hallucination, and naturalness. Specialist in synthesizing complex rationales for Side-by-Side (SxS) model rankings to drive iterative model improvement.

CORE COMPETENCIES

- **AI Evaluation:** SxS Ranking, Grounding Verification, Hallucination Detection, Integration Analysis.
- **Prompt Engineering:** Multi-turn Scenario Design, Edge-case Testing, Personalization Stress-Testing.
- **Analytical Writing:** Defensible Rationales, Technical Annotation, Error Categorization.
- **Technical Proficiency:** Google Ecosystem (Gmail, Search, YT API logic), Markdown, JSON, Data Hygiene.

PROFESSIONAL EXPERIENCE

AI Content Evaluator | Remote (Contract)

January 2023 – Present

- Perform rigorous quality assurance on Large Language Model (LLM) responses, focusing on factual accuracy and linguistic naturalness.
- Execute complex Side-by-Side (SxS) evaluations, providing detailed, evidence-based rationales for model preference based on strict rubric adherence.
- Identify and categorize "overnarrating" and robotic phrasing in model outputs, contributing to the refinement of more human-centric conversational flows.
- Collaborate with engineering teams to flag systemic failures in model reasoning and grounding.

Data Analyst / Linguist | Safaricom PLC

June 2020 – December 2022

- Analyzed large datasets of user interactions to identify patterns in intent and sentiment, improving automated response accuracy.
- Authored comprehensive reports on user behavior and linguistic trends within the East African market, ensuring cultural and contextual relevance.
- Developed structured guidelines for data labeling and annotation, reducing inter-annotator disagreement by 15%.
- Managed high-volume data pipelines with meticulous attention to detail, ensuring 99% accuracy in final deliverables.

Junior Research Assistant | University of Nairobi

January 2018 – May 2020

- Conducted qualitative research on language acquisition and syntax, developing a keen eye for nuanced linguistic errors.
- Synthesized complex academic texts into concise summaries, a skill directly applied to writing defensible rationales for AI model rankings.

EDUCATION

Bachelor of Arts in Linguistics (with Minor in Computer Science)
University of Nairobi

TECHNICAL SETUP & AVAILABILITY

- **Hardware:** High-performance laptop, stable fiber-optic internet connection (Zuku/Safaricom Home).
- **Availability:** Full-time (40 hours/week), capable of 4+ hours overlap with PST.
- **Tools:** Expert power-user of Google Workspace (Gmail, YouTube, Search) and integrated AI tools.
